📖 PROFILE

Hello, my name is Bradley Hapgood. I'm an ambitious front-end Developer, I have an aspiration to be a Full-stack developer. My skills are in **Vuejs**, **SvelteJS**, and **Python**. I believe these skills in China are invaluable to any company. These 3 skills alone can get any project done quickly and effectively.

🎓 EDUCATION

Full Sail University, B.A Web Development 🔗

Learned about Front End Web Development with React, Backend Development with Python, and Databases integration with MongoDB

Sep 2022

Winter Park, United States

Full Sail University, Cert. Application Development 🔗

Learned computer programming basics using industry-standard software development processes, coding experience, learn app development essentials, and get familiar with workflows and documentation, and technical writing.

Mar 2022 – Aug 2022

Winter Park, United States

📁 PROJECTS

Invoice Application 🔗

For this CRUD project, I used Sveltekit. In this app, you can create an invoice, edit the invoice, read the invoice on dynamic routes, and delete the invoices.

Jan 2022 – Feb 2022

IP Tracker App 🔗

In this app, I took 2 API's and connected them together to create this IP Tracking app. Put in an IP address and it'll show you everything you need to learn about that IP address from their location to their ISP.

Aug 2021

Simon 🔗

This is an old memory game from the 1980s, press the start button, and the game will flash the lights, click in the order they appear and after 8 rounds, you'll win the game.
